Ann Ramirez (Ann Gordon-Ross) **Associate Professor**

University of Florida, Department of Electrical and Computer Engineering, Gainesville, Fl, 32611 Homepage: http://www.ann.ece.ufl.edu; E-Mail: annramirez1014@gmail.com; Phone: +1-352-448-9297 Member of the NSF Center for Space, High-Performance, and Resilient Computing (SHREC) at UF; http://www.chrec.org

Research Interests

With Blockchain's immutable ledger's potential solution for trusted computing, shipping logistics, banking and finance, theft, money laundering, contracts, culpability, liability, accountability, ownership rights, etc., etc., I am currently exploring challenges in leveraging Blockchain technology in Internet of Things (IoT) devices for enhanced data privacy, security, ownership, and monetization. Research focus ranges from holistic system-level layouts to per-device System-on-Chip (Soc) architectural designs considering dynamic and heterogeneous resources for low power-/energy-based Blockchain operations.

Education

Moralis Academy (https://academy.moralis.io/)

Enrolled - Blockchain Certificate Programs

University of California, Riverside

- Ph.D. in Computer Science and Engineering
- Advisor: Frank Vahid, Professor in CISE at the University of California, Riverside, and co-founder and Chief Learning Officer of zyBooks
- **Co-advisor:** Nikil Dutt, Chancellor's Professor in EECS at the University of California, Irvine.

University of California, Riverside

- Bachelor of Science, Computer Science and Engineering
- Graduated Magna Cum Laude
- Graduated High-GPA Female Student in the College of Engineering class of 2000

Teaching Experience

- Associate Professor, University of Florida
- Assistant Professor, University of Florida
- Associate Instructor, University of California, Riverside

Teaching Expertise

My education, degrees, and teaching experience provides me with the necessary skill base to teach a wide variety of courses in the Computer Science and Computer Engineering disciplines at both the graduate and undergraduate levels. My teaching expertise includes, but is not limited to all levels of computer architecture, embedded system, system-on-chip and IoT design, logic and digital design, microprocessor design, software (C/C++ expertise) and hardware (VHDL expertise) programming, algorithms and data structures, Blockchain, ASIC design, FPGA logic design, hardware synthesis, hardware/software co-design, high-performance computing, etc.

- Editorial Boards IEEE Transactions on Emerging Topics in Computing (TETC) 2018-present; United Scholars Publications Journal of Informatics and Computing Technology, 2015-present; IEEE Embedded Systems Letters (ESL), 2013-present; IEEE Transactions on Parallel and Distributed Systems (TPDS), 2014-present; IEEE Transactions on Computers (TC), 2015-present; MDPI Computers, 2017-present; Special Section Submissions to IEEE Embedded Systems Letters (ESL), 2017-2019; Special Section on "In-Memory Computing: integration, tools and applications" in IEEE Transactions on Emerging Topics in Computing (TETC), 2019; Special Section on "In-Memory Computing: integration, tools and applications" in IEEE Transactions, tools and applications in IEEE Transactions, tools and applications in IEEE Transactions, tools and applications on Emerging Topics in Computing (TETC), 2019; Special Section on "In-Memory Computing: integration, tools and applications" in IEEE Transactions, tools and applications in IEEE Transactions, and applications is in IEEE Transactions, and applications is in IEEE Transactions, and applications is in IEEE Transactions, and application
- Guest Editorials Multi-Core Systems-On-Chips Design and Optimization, Special Issue MDPI Computers, 2018 - 2019.
- Special section organizer <u>Special section on</u> "Attacking Dynamic Optimizations in the Era of Complex Heterogeneous Multi-core Computing," IEEE International Symposium on VLSI (ISVLSI) 2018.
- Advisory/Technical Committees IEEE Women in Engineering Workshop, IEEE International Conference on Computer Design (ICCD), October 2015; IEEE Outreach Workshop on Multicore/Many-core SoC Design & Development. IEEE International System-on-Chip Conference (SOCC), Sept 2015; IARIA International Conference on Mobile Ubiquitous Computing, Systems, Services and Technologies (UBICOMM), 2014 to present; Women in Engineering ProActive Network (WEPAN) 2011 – 2014; IEEE International Conference on Embedded and Ubiquitous Computing (EUC), August 2014;
- Session Chair IEEE International Conference on Computer Design (ICCD), 2019, 2011, 2019; IEEE/ACM International Conference on Hardware/Software Codesign and System Synthesis (CODES+ISSS), 2017; IEEE International System-on-Chip Conference (SOCC), Sept 2015; IEEE International Conference on Embedded and Ubiquitous Computing (EUC), 2014; ACM Great Lakes Symposium on VLSI (GLSVLSI) 2008, 2014; National Association for Multicultural Engineering Program Advocates (NAMEPA) and the Women in Engineering ProActive Network (WEPAN) Conference `2010; IEEE Design Automation Conference (DAC). 2010; IEEE/ACM International Conference on Compilers, Architecture, and Synthesis for Embedded

Systems (CASES), 2008; IEEE/ACM International Conference on Hardware/Software Codesign and System Synthesis (CODES+ISSS), 2008 – 2009; IEEE Computer Society Annual Symposium on VLSI (ISVLSI), 2008.

Memberships - Global Blockchain Association (GBA) – University of Florida representative since 2021, Women in Engineering ProActive Network (WEPAN) Since 2009, ACM Since 2007, IEEE Since 2001

Invited Panelist

- Women Breaking the STEM Ceiling: Removing Barriers for Current Students. GlobalMindED Conference, June 2015.
- 10 Years of Ubiquity: Remaining Challenges. IARIA International Conference on Mobile Ubiquitous Computing, Systems, Services and Technologies (UBICOMM), October 2013
- *Breakout Session: Enhancing Student and Faculty Diversity*. Electrical and Computer Engineering Department Heads (ECEDHA), 2013.
- Ubiquitous Systems Ubiquity for Everyone: What is Missing? IARIA International Conference on Mobile Ubiquitous Computing, Systems, Services and Technologies (UBICOMM), October 2010
- *Image Processing and Dynamic Partial Reconfiguration*. The International Conference on Engineering of Reconfigurable Systems and Architectures (ERSA), July 2010

Invited Talks

- Machine Learning-based Prediction for Phase-based Dynamic Architectural Specialization. R. Vazquez, I. S. Badreldin, M. H. Alsafrjalani, and A. Gordon-Ross. *IEEE Computer Society Annual Symposium on VLSI (ISVLSI)*, July 2019
- Realizing Closed-loop, Online Tuning and Control for Configurable-cache Embedded Systems: Progress and Challenges. I. S. Badreldin, A. Gordon-Ross, T. Adegbija, and M. H. Alsafrjalani. *IEEE Computer Society Annual Symposium on VLSI (ISVLSI)*, July 2018.
- Exascale May Not Be Possible Without FPGAs. A. Gordon-Ross and G. Stitt. *International Green and Sustainable Computing Conference (IGSC)*, October 2017.
- Design Space Exploration for Hardware/Software-based Embedded Systems. A. Gordon-Ross. Emerging Technologies: Communications, Microsystems, Optoelectronics, Sensors (ETCMOS), May 2017.
- Deep Learning with Intel DAAL on Knights Landing Processor. D. Ojika and A. Gordon-Ross. IML Machine Learning Workshop, March 2017.
- *IEEE Global Virtual Workshop on Early Career Faculty Development: Student Assessment, Grading, and Cheating.* IEEE 2015 Early Career Faculty Development (ECFD) Virtual Workshop, October 2015.
- *Creating a Research Program.* Global Virtual Mini-Conference Series on Early Career Faculty Development (ECFD), December 2014.
- *Proactively Enhancing STEM Diversity*. Women in Engineering Workshop (WIE) Co-located with the IEEE International Conference on Computer Design (ICCD), October 2014.
- *Pursuing an Academic Position in ECE.* Women in Electrical and Computer Engineering (WECE) Female Faculty Seminar, Dexpartment of Electrical and Computer Engineering, University of Florida, February 2014.
- *Self-Adapting Optimization Techniques for Design-Constrained Embedded Systems.* Department of Electrical and Computer Engineering, NC State University, January 2012
- *Self-Adapting Optimization Techniques for Design-Constrained Embedded Systems.* Department of Electrical and Computer Engineering, University of Florida, September 2011.
- Profiling and Optimization Methodologies for Wireless Sensor Networks. CMOS Emerging Technologies (CMOSET), June 2011.
- *VAPRES: A Customizable and Flexible Base Architecture for Partially Reconfigurable Systems.* The International Conference on Engineering of Reconfigurable Systems and Architectures (ERSA), July 2010

Funding

Total Funding - \$6,248,377 (as PI - \$1,698,864; as Co-PI - \$4,235,996)

- SHF: Small: Enabling New Machine-Learning Usage Scenarios with Software-Defined Hardware Co-PI

 National Science Foundation, \$499,515 (Co-PI portion \$175,998). October 2019 to September 2022.
- Phase I I/UCRC University Of Florida: Center For Space, High-Performance and Resilient Computing *Co-PI* - National Science Foundation, \$450,000. July 2017 to June 2019.
- CSR: EAGER: Quality-of-Experience-Aware Runtime Optimizations for Heterogeneous Multi-Core Systems – PI – National Science Foundation, \$278,382. July 2017 to June 2019.
- NSF Center for High-Performance Reconfigurable Computing (CHREC) Co-PI (PI Dr. Alan George) -NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$325,000. January 2012 to March 2018.
- CAREER: A Self-Tuning Cache Architecture for Multi-Core Systems (Supplement) PI National Science Foundation, \$107,923. April 2016 – April 2018.
- F2-15: VAPoR: Virtualization for Adaptivity, Productivity, Portability, and Redundancy. Co-PI (PI Dr. Gregory Stitt) NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$120,000. January 2015 to December 2015.
- **F4-15:** Hybrid Space Computing. *Co-PI* (*PI Dr. Alan George*) NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$232,000. January 2015 to December 2015.
- **F5-15: Processor Metrics, Benchmarks, and Optimizations.** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$216,000. January 2015 to December 2015.
- **F6-15: Space Processors, Applications, and Networks.** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$332,000. January 2015 to December 2015.
- New 2014 CHREC membership Draper Laboratory. *PI* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$40,000. January 2014 to December 2014.
- **F4-14:** Hybrid Space Computing. *Co-PI* (*PI Dr. Alan George*) NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$220,000. January 2014 to December 2014.
- **F5-14: Processor Metrics, Benchmarks, and Optimizations.** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$148,000. January 2014 to December 2014.
- **F6-14:** Space Processors, Systems, and Applications. *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$276,000. January 2014 to December 2014.
- **F4-13: Partially Reconfigurable System Development and Management** *PI* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$60,000. January 2013 to December 2013.
- **F5-13: Processor Metrics, Benchmarks, & Characterizations** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$296,000. January 2013 to December 2013.
- **F6-13: Space-based Systems & Networks** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$196,000. January 2013 to December 2013.
- Bitstream Compression for Field-Programmable Gate Arrays PI University of Florida's University Scholar's Program, \$2,250. August 2012 to May 2013.
- **F4-12: High-Level Frameworks for Partially Reconfigurable Systems** *PI* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$80,500. January 2012 to December 2012.
- **F5-12: Device Analysis and Comparison Metrics, Reliability, and Dependability –** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$91,000. January 2012 to December 2012.

- **F6-12:** Advanced Space Computing *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$112,000. January 2012 to December 2012.
- F4-11: High-Level Frameworks for Partially Reconfigurable Applications PI (with Co-Pi Dr. Alan George) NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$95,000. January 2011 to December 2011.
- **F5-11: Device Performance Metrics and Mission-Critical Processing Tolerance** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$139,000. January 2011 to December 2011.
- **F6-11:** Adaptive Space Computing Architectures *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$111,000. January 2011 to December 2011.
- NSERT Postgraduate Scholarship (PGS D) *PI* Natural Sciences and Engineering Research Council of Canada, \$42,000. September 2010 September 2012.
- CAREER: A Self-Tuning Cache Architecture for Multi-Core Systems PI National Science Foundation, \$539,623. May 2010 – April 2017.
- **F6-10:** Adaptively Fault-Tolerant Reconfigurable Architectures *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$126,000. January 2010 to December 2010.
- F4-10: PR Architecture and Design Toolset for Embedded and Aerospace Systems Reconfiguration PI (with Co-Pi Dr. Alan George) – NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$98,000. January 2010 to December 2010.
- Small Satellite Communications and Sensor Network Co-PI (PI Dr. Janice McNair) National Science Foundation, \$450,000. August 2009 to July 2012.
- F4-09: Virtual Architecture and Design Automation for Partial Reconfiguration *PI* (*with Co-Pi Dr. Alan George*) NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$95,000. January 2009 to December 2009
- **F6-09: Reconfigurable and Hybrid Fault Tolerance** *Co-PI (PI Dr. Alan George)* NSF Center for High-Performance Reconfigurable Computing (CHREC) at the University of Florida, \$147,000. January 2009 to December 2009.
- A Dynamic Profiling and Optimization Platform for Sensor-Based Networks PI (Collaborative Research with Dr. Susan Lysecky and Dr. Roman Lysecky at the University of Arizona) National Science Foundation, \$208,100. August 2008 to July 2010

Synergistic Activities and Outreach

- UF WECE SwampHacks Jan 2019
- **UF Diversity and Inclusion Committee** *Since* 2019
- UF Campus Security Authority Since 2019
- Alachua County Public School Science Fair Judge Alachua County, Florida Nov 2018
- Wahini Workshop Outreach to underpresented Pacific Islander minorities to inspire perusal of professional jobs. Kailua-Kona, Hawaii – Since 2018
- College of Engineering Research Fair Event to introduce new students to research in science and engineering – University of Florida – 2018
- Career Showcase (WECE) Showcase event to introduce new students to research in science and engineering University of Florida Feb 2018, Feb 2019, Sept 2019
- Adpot-athon (WECE) University of Florida, Nov 2018, Nov 2019.
- Cade Museum Volunteer Event (WECE) Volunteer work for the University of Florida, Cade Museum. University of Florida, Cade Museum - 2018
- Presidents' Day Visit Introducing high school students and parents about majors in engineering. University of Florida - 2017
- **Girls Build** Hands-on activities to explore how engineering ties in with future careers of women. *University of Florida, Cade Museum* 2017.

- Makey Makey (WECE) Utilized Makey Makey, littleBits, and paper circuits to create interactive projects to teach K-12 students and inspire STEM education. University of Florida, Cade Museum 2017.
- **STEMazing Race (WECE)** High school students complete challenges that connect all fields of STEM throughout campus and race to the finish line with quality solution to each challenge. *University of Florida Feb* 2016, *Feb* 2017, *Feb* 2018, *Feb* 2019.
- Judge at State Science and Engineering Fair (SSEF) of Florida State science and engineering fair for high-school students *since* 2014.
- **Comprehensive Support for STEM Students with Learning Disability (CS3LD)** *Faculty Mentor* 2013-2014.
- **Women's Student Association (WSA)** *Women's Mentoring Program Volunteer Mentor, since 2012.*
- Lab Tour Host Lab tour and information session for high school students In conjunction with Junior Science, Engineering, and Humanities Symposium (JSEHS), since 2011.
- University Minority Mentoring Program (UMMP) Volunteer Mentor, University of Florida, since 2008.
- Phi Sigma Rho National Society for Women in Engineering and Engineering Technology Faculty Advisor, University of Florida, since 2008.
- **Women in Electrical and Computer Engineering (WECE)** *Faculty Advisor, University of Florida, since 2007.*

Awards, Fellowships, and Honors

- College of Engineering Doctoral Dissertation Advisor/Mentoring Awardee Academic Year 2015-2016
- Best Paper Award "Dynamic Phase-based Optimization of Embedded Systems," T. Adegbija and A. Gordon-Ross. IEEE Computer Society Annual Symposium on VLSI (ISLVSI), July 2014 PhD Forum
- CAREER: A Self-Tuning Cache Architecture for Multi-Core Systems PI National Science Foundation, \$539,623. May 2010 – April 2015.
- Best Paper Award "A One-Shot Dynamic Optimization Methodology for Wireless Sensor Networks," A. Munir, A. Gordon-Ross, S. Lysecky, and R. Lysecky. *IARIA International Conference on Mobile Ubiquitous Computing, Systems, Services and Technologies (UBICOMM*'10), Florence, Italy, October 2010.
- Best Paper Award "Lightweight Runtime Control Flow Analysis for Adaptive Loop Caching," M. Rawlins and A. Gordon-Ross. ACM Great Lakes Symposium on VLSI (GLSVLSI), May 2010.
- 2008 IT Florida Award Recipient 2008 Excellence in Sustainability Through Information Technology Presented to The Energy Efficient Ethernet Project, October 2008.
- Graduated Magna Cum Laude June 2000.
- Outstanding Student Commencement Award, Marlan and Rosemary Bourns College of Engineering June 2000. Selected as the outstanding female student in engineering in the graduating class of 2000.

Advised Students

Graduated Ph.D. Students

- Ruben Vazquez "Machine Learning Techniques For Dynamic Architectural Optimizations Of Embedded Systems" May 2022
- David Ojika "Flexible Architecture for Programmable Accelerators at Datacenter-Scale" May 2017.
- Nicholas Wulf "Framework for Optimizing FPGA-Based Space Systems" May 2016.
- Hammam Alsafrjalani "Dynamic Scheduling for Configurable Heterogeneous Embedded Systems" Dec 2015. Currently an Assistant Professor in Practice, University of Miami, College of Engineering Electrical and Computer Engineering Department.
- Shaon Yousuf "Design Automation For Partially Reconfigurable FPGAs: Design Flows, Tools And Architectures" Dec 2015. Currently at Intel Corporation.
- Aurelio Morales-Villanueva "On-Chip Software Tools for Hardware Multitasking on Partially Reconfigurable FPGAs" *May 2015*. Currently a Professor at the Universidad Nacional de Ingenieria in Lima, Peru.
- Rohit Kumar "Rapid Partial Reconfiguration Application Development" May 2015. Currently at Schweitzer Engineering Labs.
- **Tosiron Adegbija** "Dynamic Phase-based Optimization of Embedded Systems" *May 2015*. Currently an Assistant Professor at the University of Arizona.

- Wei Zang "Analytical Modeling and Analysis Of Memory Access For Cache Tuning" May 2013. Currently a Staff Research Engineer at SK Hynix Memory Solutions Inc.
- Marisha Rawlins "Dynamic Low Energy Cache Optimizations for Embedded Systems" *May 2012*. Currently an Assistant Professor at the University of Trinidad and Tobago.
- Arslan Munir "Modeling and Optimization of Single-core and Multi-core Embedded Systems" May 2012. Co-Advised by Dr. Sanjay Ranka, Professor in the Department of Computer Information Science and Engineering at the University of Florida. Currently an Assistant Professor at Kansas State University.

Graduated Masters Thesis Students

Karthikeyan Sabhanatarajan – "Smart-Nics: Power Proxying For Reduced Power Consumption in Network Edge Devices" – December 2008. Current employed as an Engineer in Software Engineering at Cisco Systems, Inc.
