

ARM[®]

ANNOUNCES FREE SEMINAR

at the University of Florida

ARM announces a technical seminar specifically for university students at UF. In about 1 hour, the seminar covers the company business model, ARM processors and architectures, programmers models, the ARM Instruction Set Architecture, power issues, core pipelines, development tools, and a demonstration of the latest ARM technology. The seminar is free to students.

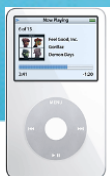

If you are an engineering or computer science student studying hardware or software, computer architecture / organiza-

tion, embedded, real-time systems / applications, microprocessors/MCUs, low-power applications, robotics, mechatronics, or you're starting a project, you will find this short course useful. Think of it as a crash course on ARM.

Date: Thurs Sept 29th, 2011

Time: 12:50–1:40 PM

Location: CSE E107

Students will be eligible to win an iPod Shuffle!
